Verbal Reasoning Results

John Smith

Date compiled: September 7, 2022

Overview of your results

About this test

The Verbal Reasoning test measures your ability to interpret, evaluate and draw logical conclusions from written information. Understanding how strong your verbal reasoning skills are allows you to make better-informed career choices based on your suitability from a communication perspective, and can prepare you for any upcoming employment or candidate tests.

How you scored

John, you achieved a raw score of **65%** in the Verbal Reasoning test.

The raw score is the sum of all your correct responses divided by the number of all test questions, which is then converted into a percentage. You answered **26** out of **40** questions correctly.

Correct answers	Incorrect answers	Unanswered
26	10	4

Time used	Time left	Avg. time per question
You	*You*	*You*
28:14	01:46	0:42
User average	*User average*	*User average*
29:47	00:13	0:44

Your score explained

John, as you achieved a **high score** in the Verbal Reasoning Test, you'll be **very capable** of performing tasks and activities that require written and oral communication skills.

Your score indicates that you are **strongly skilled** in comprehending and processing written information, thinking constructively, and communicating effectively in the English language.

John, this means you would perform **very well** in careers that require and rely on strong written and oral communication skills.

Although your overall Verbal Reasoning Test results can be a great indication of your ability to draw logical conclusions from written information, they should not be the only factor considered when choosing a career. By completing all six CareerHunter tests, you will gain a more in-depth understanding of your aptitudes, as well as your interests, personality and motivations — and, therefore, make a better-informed career choice.

How you compare

This is how you compare to all other CareerHunter test-takers who took the Verbal Reasoning Test:
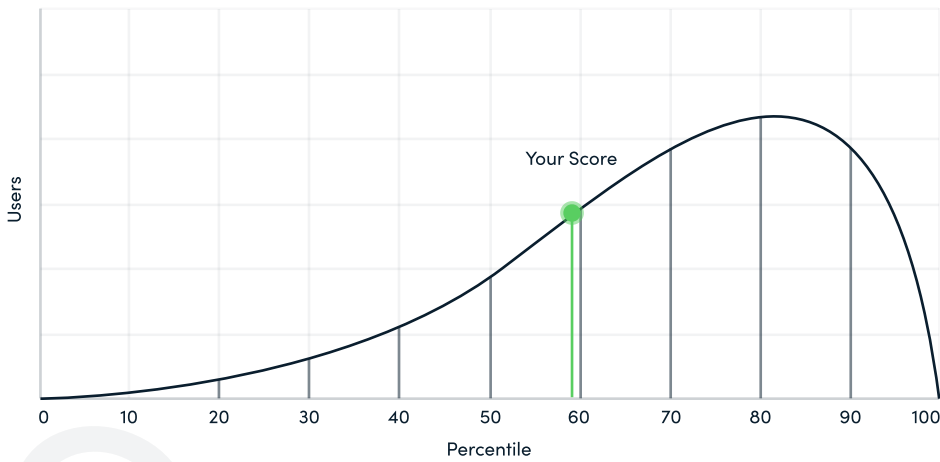

You're in the 59th percentile.

John, your score places you in the 59th percentile, meaning that you scored higher than 59% of all other users who took the Verbal Reasoning Test.

Your sten score is 6.2.

The sten score is a standardized score on a 10-point scale where 1 indicates low performance and 10 indicates high performance. It has a mean of 5.5 and a standard deviation of 2. For example, if you scored lower than 5.5, it means you scored below average; if you scored higher than 5.5, then you scored above average.

Your T-score is 40.

The T-score is a standardized score ranging between 20 and 80 with a mean of 50 and a standard deviation of 10. It indicates how far your score is from the mean. For example, if you have a T-score of 60, it's one standard deviation above the mean.

You scored 8% above the median.

The median raw score of all other test-takers on CareerHunter is currently 57%, meaning you scored 8% above the average.

Your test answers

John, here is how you answered the questions in the Verbal Reasoning Test.

Q1. Correct ✅

Safety Directions for Social Networking

Thanks to social networking, people across the world now have access to tools and resources that were previously non-existent. It can be used to make friends or even promote a business. However, it's important to remember that social networking can also be misused, and the potential dangers are many and great. For this reason, users are advised to do everything in their power to protect their privacy and reputation. You should be careful how you use social media, but that doesn't mean you should hesitate using all its functions.

Social Media

While everyone uses social media, doing so involves a great deal of potential dangers. For example, it is common nowadays for employers to check the social media profiles of prospective candidates or even their existing employees. This could damage your financial situation or even your career. However, social media does not have to be completely avoided. While it is a new way of social interaction, it is crucial that you are selective in the functions you use and to be cautious concerning the dangers involved.

Which of the following points do the two passages disagree on?

- ✅ Social networking prevails in our everyday lives.
- ○ The degree of avoidance of social media functions.
- ○ Examples of the uses of social media.
- ○ The existence of undesirable effects of social networks.

Q2. Incorrect ❌
